PROJECT TYPE: Jewellery Ecommerce Mobile App
Client name: Caesar

BUSINESS DOCUMENT

Date:	Document Type	Version	Prepared By
09/07/2024	Price Quotation	1.0	Mansab Mir

This is Business requirement document v1.0, which includes the requirement on the basis of discussions between both the parties; functions mentioned in the document may be subject to change before the sign off only.

Introduction:

We are a leading agency that deals in Website design, Website development, Android application development, SEO, Social media management and cloud solutions.

Project Overview:

Develop a mobile application that works on cross-platforms, focusing on eCommerce for jewelry.

Project Breakdown Major Stages:

1. **Wireframing and Figma design of entire application**
2. **Backend development of apis, database integration for Dashboard and Application both.**
3. **Frontend Development of application for cross platform and responsive design, integration of apis**
4. **Integration of payment methods**
5. **Testing deployment and delivery of project.**

Step Description	Duration (in days)	Cost
Wireframing of entire app to create layout structure of app.	3 to 4 days	120$
Converting Wireframe into Design with proper colors and formatting, making a final prototype	5 to 8 days	250$
Development of Backend apis, database integration for both App & Custom Dashboard	10 to 12 days	1,500$
Development of Frontend, Integration of APIs, and responsiveness of app	10 to 12 days	1,200$
Testing of all features of Application and Dashboard	1 to 2 days	100$
Testing security, payment transfer, unit and integration testing, Cross platform testing of app	2 to 3 days	100$
Deployment of dashboard and backend on servers, final testing on production mode	1 to 2 day	Free
	32 to 40 days	3,270$

Total Days: **32 to 40 working days**

Total Cost: **3270$**

Looking Forward To Working With You!
Thank You, From Codechip.
